Room Booking System — Configurator Software

RBS Configurator

ATEN RBS Configurator is a software used to centrally configure and manage mass VK430 10.1" RBS Panels and works in conjunction with mainstream calendar servers, such as Microsoft 365 Calendar, Google Workspace Calendar, and Microsoft Exchange Server, to provide convenient management of conference rooms, including scheduling, availability allocation, reservation, and status indication of all conference rooms in the system. With its intuitive GUI design, administrators can effortlessly configure panel settings, to be uploaded to the VK430 managed, such as language, sleep mode brightness, volume, firmware update settings, and more. For a layout that's aligned with the office setting and corporate identity, RBS Configurator allows administrators to upload logos and backgrounds, as well as change the calendar style of the VK430 managed.

The RBS Configurator, along with VK430 10.1" RBS Panel, presents an ideal, smart solution suitable for any meeting and conference room, boardroom, classroom, and any other room-booking management. It does not only optimize space utilization efficiency but also effectively elevates the overall room-booking experience.

Features

- Easy RBS panel configuration via intuitive GUI
  - Profile set-up (logo, background, calendar layout, etc.)
  - System setting (language, sleep mode brightness, volume, etc.)
